4 reasons why your ISV products need digital adoption

1

A license designed specifically for Microsoft ISVs

As an ISV, you produce and market your own IP. With ClickLearn, you can now add digital adoption and user training to your own solutions.

2

Reach a global market faster

One of the keys to ISV success in the Microsoft ISV eco-system is to go global. ClickLearn helps you do just that. ClickLearn allows you to execute user adoption in more than 100+ languages with no extra effort on your part.

3

Keep your content current with every upgrade

As your ISV solution evolves over time, so should your user adoption and learning materials. We have made that easy with ClickLearn. Simply run replay and update your materials and screenshots to match the latest version of your product.

4

Deliver a perfect customer experience every time

When users are downloading trial licenses of your product, they need specific training to help get started and showcase your product. Once they purchase your product, they will need other forms of training to make your product a part of their business processes. With ClickLearn you can now deliver that purpose specific training and provide the best possible customer experience in every step.
